Pedigree based match probability results

Match probabilities

Type	Probability	Iterations	Model probabilities	Model valid	Used probabilities
Average pedigree	4.3821E-05	150,000	4.2576E-05, 4.4454E-05, 4.4435E-05	True	4.2576E-05, 4.4454E-05, 4.4435E-05
Extended average pedigree	1.0000E+00	0, 0, 0	1.0000E+00, 1.0000E+00, 1.0000E+00	True	1.0000E+00
Inside match	• 1: 2.4772E-01 • 0: 7.5228E-01	150,000	2.4827E-01, 2.4835E-01, 2.4654E-01	True	2.4827E-01, 2.4835E-01, 2.4654E-01
Outside match	0.0000E+00	0, 0, 0	0.0000E+00, 0.0000E+00, 0.0000E+00	False	0.0000E+00

There is a 24.8% probability that at least one other (non-excluded) unknown individual in this pedigree matches the suspect haplotype.

There is a 0% probability that a random individual just outside this pedigree matches the suspect haplotype.

Disclaimer: The match probabilities shown above are the result of a stochastic (randomized) simulation. Due to the nature of Monte Carlo sampling, results may vary slightly between independent simulation runs, even when using the same input parameters.

Performance Metrics

- Run time pedigree probability: 0:01:45.197199
- Run time proposal distribution: 0:03:43.485344
- Run time extended pedigree: 0:00:00.000371
- Run time outside match: 0:00:00.000011
- Total run time: 0:05:28.682980
- Total needed iterations: 300,000
